

NETWORK FOR QUALITY ASSURANCE AT THURINGIAN INSTITUTIONS OF HIGHER EDUCATION

Since 1 December 2011, the University of Music FRANZ LISZT Weimar has been supported alongside Thuringia's eight other state-run institutions of higher education as part of the Thuringian government's programme 'Planung und Einrichtung eines Netzwerkes Qualitätssicherung an Thüringer Hochschulen'. The project supports activities intended to secure the quality of teaching and studying, and it will run until the end of 2013.

The programme aims to establish networks between the Thuringian institutions in the area of quality assurance, and to focus and develop expert knowledge in quality management. The network hopes, in particular, to establish ideal, transparent flows of information both between and within the partner institutions. Core interests of the network are the definition of quality standards and indicators, the optimisation of communicative structures, the execution of evaluation processes, as well as the definition and design of standard processes.
