

INTERNATIONAL AFFAIRS | ERASMUS+

International co-operations play a central role in the realisation of the LISZT University's educational ideals. They give students and teaching staff alike insight into multifaceted practices of international music education, performance, and mediation. The exchange of students and teachers, as well as the co-operation in projects and joint research, generate new ideas.

On this page, you will find information about our exchange programmes with international partner institutions, guidelines for the preparation of your time abroad, and some material about the host institutions. International students will find useful information about Weimar, and about the opportunities to study at the University of Music FRANZ LISZT Weimar. The site also reminds you of things you will need to do before / after coming to Weimar.
